

Sendoline Endo Motor - maximum freedom of choice!

Sendoline Endo Motor is a cordless rechargeable motor for endodontics. The latest technology unites the simplicity of preset programs with the freedom to choose your own settings – maximum freedom of choice.

Access

The neat contra-angle is rotatable 360° allowing easier access, while the narrow neck and small head of the contra-angle do not obscure your view.

Choice

Sendoline Endo Motor can be used for both rotary and reciprocating systems, giving you maximum freedom of choice.

Easy to use

The motor is ergonomically well adapted, lying lightly and balanced in your hand.

Cordless

Sendoline Endo Motor is cordless and when necessary is charged using the charging station.
